Stratsys
Sweden

July 26, 2026

Dear Stratsys Hiring Team,

Stratsys' commitment to structuring business-critical areas like GRC, ESG, and Quality Business Management through a SaaS platform is impressive. It's a sector that demands precision and adaptability, both of which are crucial in today's complex regulatory environments.

The role's focus on AI-driven services aligns perfectly with my experience at Cursiva.se, where I built an end-to-end multi-agent pipeline using LangGraph and FastAPI. This project demonstrated my ability to integrate AI capabilities into practical, scalable solutions, a key aspect of your AI Engineer role.

I'm particularly curious about how Stratsys approaches the challenge of scaling AI capabilities across multiple teams while maintaining a focus on business impact. Understanding the balance between technical ambition and pragmatic solutions in your environment is something I'm eager to explore.

Joining a company where AI is becoming integral to both products and internal processes is exciting. While my experience with LangChain is limited, my work with LangGraph and multi-agent systems provides a strong foundation to grow from. Stratsys' mission to create real business value through AI resonates with me deeply.

Best regards,

Heishigan Pathmaraj
